(54) Title: VIDEO APPARATUS

(57) **Abstract:** A video apparatus has a digital decoder (38) generating a first digital stream (YCbCr₃), a video source (24) of a first analogue signal (A₁), a video encoder (42) and a first video decoder (28) connectable to the video source (24) for generating a second digital stream (YCbCr₁) based on the first analogue signal (A₁). A switch (40) is coupled to the first video decoder (28) and to the digital decoder (38) to notably mix the second digital stream (YCbCr₁) and the first digital stream (YCbCr₃) into an output digital (YCbCr_{out}) stream to the video encoder (42).
